EXAMINER'S AMENDMENT

Claim 2 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 8, directed to the species of II and III no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Christopher A. Bennett on August 19, 2004.

The application has been amended as follows:

Claim 1 (currently amended): A flyback transformer comprising a coil including a secondary multi-layered winding which is divided by a dividing diode, a diode being connected to a low potential-side of said secondary multi-layered winding,

Art Unit: 2832

wherein a built-in component is disposed at a position corresponding to a central portion of a winding length of said coil such that a central portion of the built-in component is aligned with an AC zero potential point of said coil.
